

# Green Concept to Green IT

---

► Why Green, Not Yellow or Red ?

# Environment in Present Days

Traffic jam everywhere in big cities

# Environment in Present Days

Air pollution, Water pollution, Land pollution

# Environment in Present Days

► Stressful, painful working offices

# Global Effects

- ▶ Global warming :  
Ice cap at the North Pole continues to shrink!

1979

1979 SSMI Composite Data

2003

2003 SSMI Composite Data

# Global Effects

## ► Climate change

# Global Effects

- ▶ Electronic wastes :  
In the U.S. alone, 500 million obsolete computers, and 130 million cell phones are thrown out every year.

# Global Effects in the Future

Snow in Bangkok

Tornado hits Nakornsawan

# Green Concept

---

- ▶ Planet → Environmental benefits
  - ▶ Prosperity → Economic benefits
  - ▶ People → Social benefits
- è Sustainable development

# Green IT

---

**The study and practice of  
using computing resources  
in an efficient, effective  
and economic way.**

# Examples of Green IT

---

- ü Energy saving
- ü Disposal of electronic waste
- ü Virtualization of server resources
- ü Regulatory compliance
- ü Telecommuting
- ü End user satisfaction
- ü Return on investment

# Early Initiatives of Green IT

---

- Energy Star

- TCO Development

# Regulations & Industry Initiatives

---

## ▶ Government

## ▶ Industry

- ü Climate Savers Computing Initiative (CSCI)
- ü Green Computing Impact Organization (GCIO)
- ü Green Electronic Council
- ü The Green Grid

# Approaches to Green IT

---

- ▶ Virtualization
- ▶ Power management
- ▶ Material recycling
- ▶ Telecommuting

# Virtualization

---

- ▶ The process of running two or more logical computer systems on one set of hardware.

# Virtualization

---

- ▶ Virtualization helps a company / enterprise lower power and cooling consumption, by reducing the number of machines and servers it needs.
- ▶ Virtualization platforms can run across hundreds of interconnected physical computers and storage devices, to create an entire virtual infrastructure.

# Power Management

---

## ► Energy Star 4.0 compliant PCs

Now 80% power efficiency

Next 90% efficiency by 2010

## ► Energy Star 4.0 compliant servers

Now 85% power efficiency

Next 92% efficiency by 2010

**Caution : Screen savers do not save energy !**

# Power Management

---

- ▶ Power Supply
- ▶ Storage
- ▶ Display

# Material Recycling

- ▶ HR233, the U.S. National Computer Recycling Act
- ▶ e-Waste handling

# Telecommuting

- Teleconferencing and telepresence technology

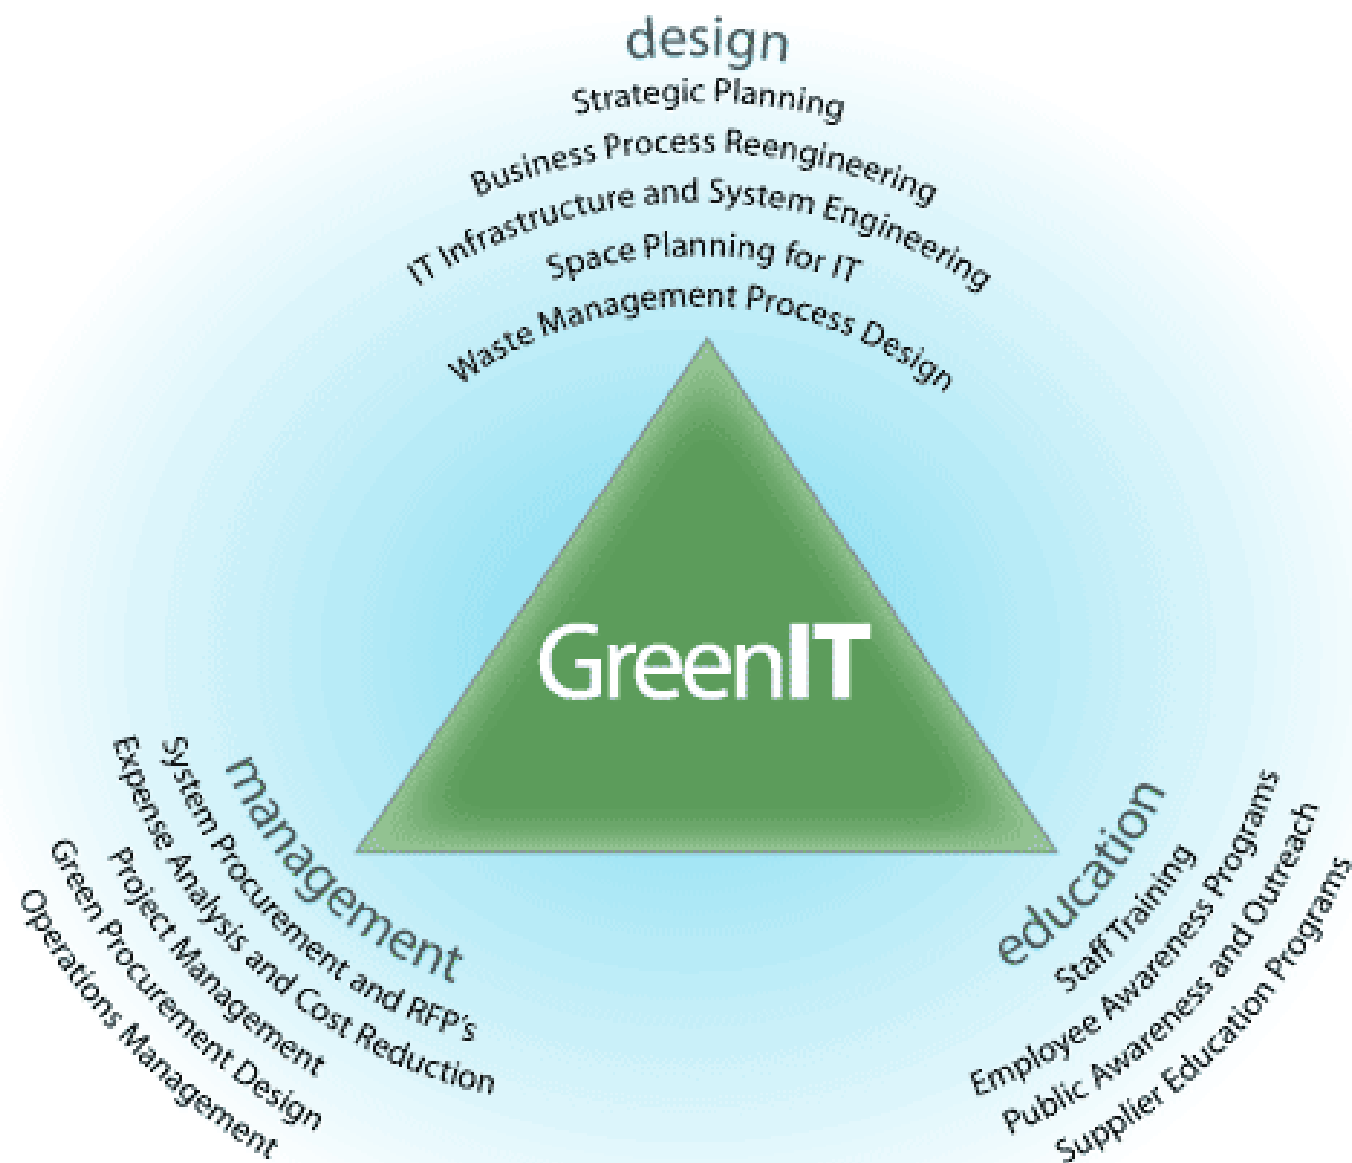

# Telecommuting

---

► Working at home

# Multiple Benefits

---

- ▶ Baht savings
- ▶ Elimination of utility shortfall
- ▶ Capital improvements
- ▶ Maintenance savings
- ▶ Better, safer lighting
- ▶ Improved temperature control and comfort
