# NETWORKING LAB

## Week # 11 Assignment

1. Creating VLAN as per given fig. You can choose IP address of hosts, as per your convenience.

The connection between Switch A and Switch B is required to be made via both modes – Trunk, Access.

2. INTER-VLAN ROUTING

You need to create a topology as per the given figure. IP Address can be assigned as per your convenience.

You need to perform Inter VLAN Routing using Router on a stick method.
